

NFPA70E Electrical Safety Training

Safety training is required every 3 years to be compliant with OSHA and NFPA70E standards. When shortcuts are taken and safe procedures are not followed, injuries, loss of life, lost work time, and increased workers' compensation costs can occur. Electrical workers must be trained to recognize and address the electrical hazards they may face in day to day job tasks.

OVERVIEW:

Excel provides training as prescribed in NFPA70E, focusing on identifying, and understanding shock and arc flash hazards and the safe work practices required to work when these hazards are present. Training is provided by an authorized OSHA Outreach trainer with 25+ years experience as a Class A Master Electrician.

ATTENDEES WILL RECEIVE:

- 4 hour or 8 Hour training session.
- Handouts of presentation
- Completion certificates
- Lunch on day of class
- Course syllabus, outline, table of contents, or training objectives

ONSITE TRAINING REQUIREMENTS:

- Classroom of 500 square feet or greater
- Projection screen with sound system

COST AND AVAILABILITY:

- Contact Excel Engineering for training dates and cost.

WHO SHOULD ATTEND:

Excel can tailor training to suit your needs. Maintenance persons, Electricians, Engineers, Operators, Supervisors, EHS managers, and those who work on and around industrial equipment will benefit from this course:

- EHS and Safety directors
- Electricians
- Engineers
- Maintenance Personnel
- Supervisors
- Owners
- Managers
